Jeff Moyer's Powerful Music Video "Climate Crisis" Calls for Action

Chula Vista, CA July 24, 2023) – Activist songwriter Jeff Moyer has released a new music video, "Climate Crisis". The song, recorded at Capricorn Studios of San Diego, with sound engineer John Joyce, urges us all into united action in this world emergency. Susan Bredau developed the gripping visual images for the production. "We join the multitude of organizations and people who are urgently calling out to fight global warming immediately. Our very lives depend on it," said Cristi Moyer, Vice President of Music from the Heart.

I listened to the *Politics War Room* podcast with James Carville," said Jeff Moyer. "Carville opine to guest and climate activist Jane Fonda that there were no songs in the climate crisis movement, and I was moved to begin to write and produce this song. While I had written other songs supporting climate-related issues, none compare with this one's urgency."

Jeff, who is blind, sings lead and plays numerous folk and indigenous world instruments. Other vocalists are Cristi Moyer, John Joyce, Rochelle Darling, Grace Ekeleme, Able Medina, Jeff's daughter Laura, and grandsons Scott and Jeremy Angell.
